SPEAK GERMAN

German Language Courses
Our programs combine academic seminars with intensive German language instruction. Learning German in an intercultural setting will not only be a lot of fun, but will also help you get the most out of your time in Germany. As an additional benefit, living with a host family will give you great opportunities to put what you've learned into practice outside the classroom and boost your language skills beyond what you would be able to achieve through coursework alone.

FEEL AT HOME

Host Family Program
Kassel's unique homestay program offers you the exciting chance to experience authentic daily life in Germany first-hand. Staying with a friendly and welcoming family will provide you with one of the quickest and most enjoyable ways to learn German through daily interaction and conversation. Your host family will be there to support you throughout your journey of exploring Germany and discovering its customs and people. They will be your home away from home.

WE CARE

Sustainable Environment / Nano Technologies / Cultural Heritage / Student Potential

The Hessen International Summer University [ISU] and the International Winter University [IWU] Kassel offer three to four-week academic programs, which feature the strengths of the University of Kassel in environmental sciences, Nano Science and German language and culture.

Roughly 60 students, who are placed with German host families for the duration of their stay in Kassel, attend each program. This unique opportunity provides you with the chance to gain insight into German culture and family life. During your time in Kassel, you will be engaged not only in inspiring academic seminars, but also in diverse cultural and social activities. While you select your seminars from either the engineering, Nano Science or the culture module, all participants join the language classes and enjoy the extensive extracurricular activities together.

Our programs are targeted primarily at advanced undergraduate students seeking international academic experience and intercultural networking, although graduate students and young professionals are also welcome to attend as well. Use your semester break as a character- and resume-building opportunity with life-long benefits.

THINK GREEN

Engineering Module

The University of Kassel plays a leading role in environmental engineering in Germany, and has contributed significantly to the advancement of renewable energy technologies worldwide through its academic research and innovative technology transfer. Taught by internationally renowned faculty members, ISU and IWU offer you the best opportunities to study today's global environmental challenges from a German perspective.

THINK CULTURE

Culture Module

Germany's cultural heritage lies in its history, arts, literature, music, and architecture. The city of Kassel is not only home to the world famous modern art exhibition "documenta" and an extensive and outstanding museum landscape, it is also where the origins of the Brothers Grimm's famous fairy tales can be found. Kassel and the surrounding region also offer plenty of opportunities to explore German history first-hand. Here you will find some of the richest cultural heritage in Germany, which makes Kassel truly an ideal place for your introduction to German culture studies.

THINK NANO

Culture Module

The University of Kassel's nanotechnology research center CINSaT gathers some of nano science's most revolutionary researchers and encourages you to explore the application of nanotechnology to everyday life. The seminar is combined with different approaches to intercultural communication in order to expand your knowledge of other cultures and the way we as humans interact.
